18.03.2015 – present: Inetex LTD – Software Developer.

<http://www.inetex.co.il>

Fit Kit appfitkit.com

Development of application for fitness centers which helps to communicate between managers/coaches and customers.

My tasks in this project are following:

Designing database structure
Creation of REST services
Writing and maintaining documentation for API
Deployment and maintenance of server using Spring Boot and heroku.com

Used languages: Java, JavaScript, Swift, MySQL via Hibernate;

Used technologies: Hibernate, Spring MVC, GitHub;

Used web technologies: jQuery, HTML, CSS;

“One Click”

Participated in development of two part client-service provider application (Web/ Android/ iOS). First part is to help people find hairdresser or stylist, select needed services and book reservation. And second part for hairdresser to manage his schedule and clients.

Main objectives of application are:

Maintaining DB with available time slots for specific hairdresser
Scheduling of work-hours for services provider
Using Google API to find closet services
Making appointment

Used languages: Java, JavaScript, Swift, MySQL via Hibernate;

Used technologies: Hibernate, Spring MVC, GitHub;

Used web technologies: jQuery, HTML, CSS;

EDUCATION

2016: Tel-Ran Computing Solutions Ltd, Rehovot, Israel.

Special program for adaptation of software developers accordingly with Israel IT technologies by Ministry of Absorption .

Recommendations are available upon request.
